If a student clicks a tab to go to another web site, or click any other programs in the computer, system will log them out. They must key in a reason to continue. Student will be disqualified if they cannot give a valid reason.

(1 point)

5. I give Ann and Bill two consecutive positive integers (for instance 7 to Ann and 6 to Bill). They know their numbers are consecutive. They know their own number, but they do not know the number I gave to the other one. Then I heard the following discussion:

Ann said to Bill: "I don't know your number."

Then, Bill said to Ann: "I don't know your number."

Then, Ann said to Bill: "Now I know your number."

What is Ann's number?

Your answer:

(1 point)

Submit work

Once the student finishes all the questions, they can check again before submitting. Make sure they click **Submit work** to submit the answers else, the answers won't be submitted, and they won't get their marks.
